

# Cool – Harvest

---

Post-harvest technology

# Post-harvest losses & the race against time

---

- 30% of produce goes to waste
- Quick deterioration of produce is a significant challenge for farmers
- Lack of affordable off-grid cooling solutions is a major constraint for

# Pre-cooling: taking our time... (and our power)

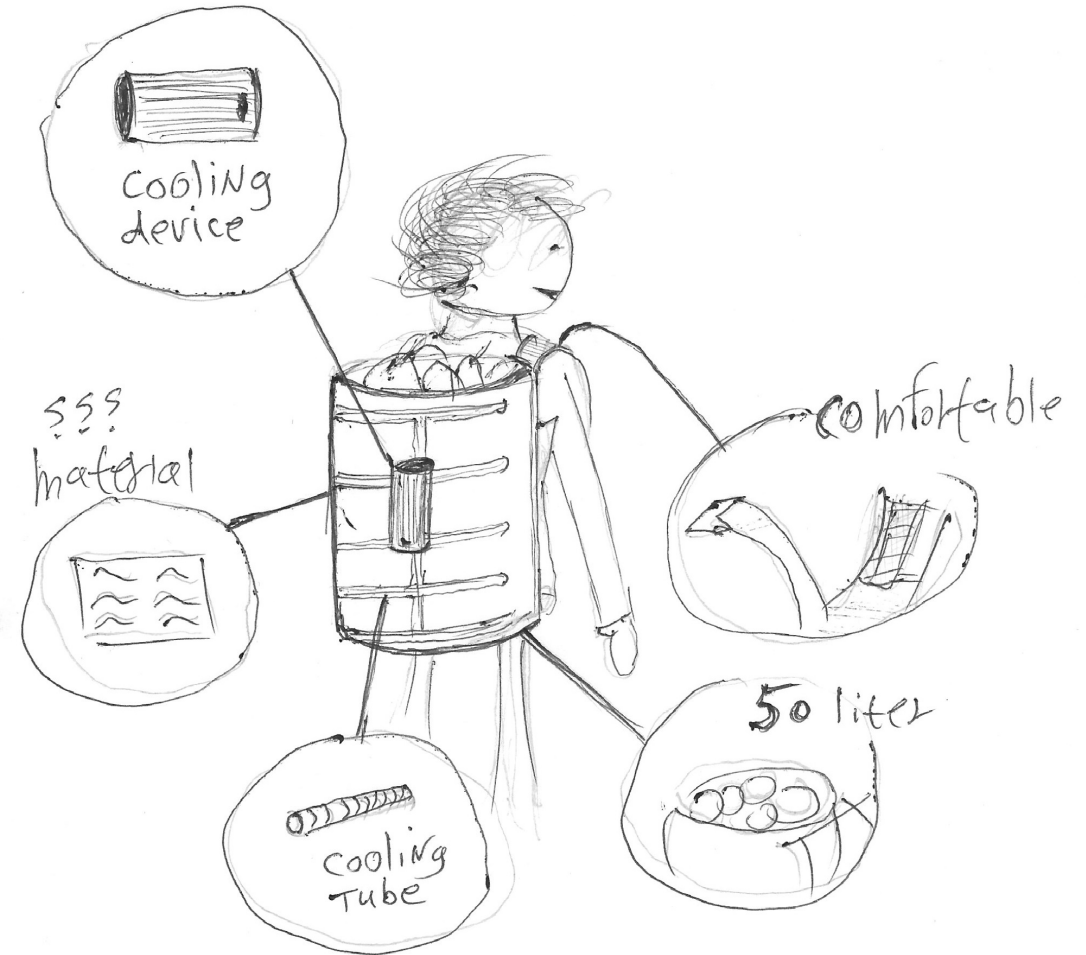

---

- First hours after harvest are crucial
- Removing field heat quickly will extend shelf life by **days**

# Technology

Yes, I know...

**...or a “head-cooling” bag**

# The impact

---

- Food safety by reducing the losses
- Health by preserving nutrients
- Prosperity through fair trading

**And now, we have more time**

# Thank you
