

Agroforestry Monitoring and Monetizing Farmers Initiatives

AMMFI CarbonForestry Venture

Dr. Dafna M. DiSegni, Founder & CEO

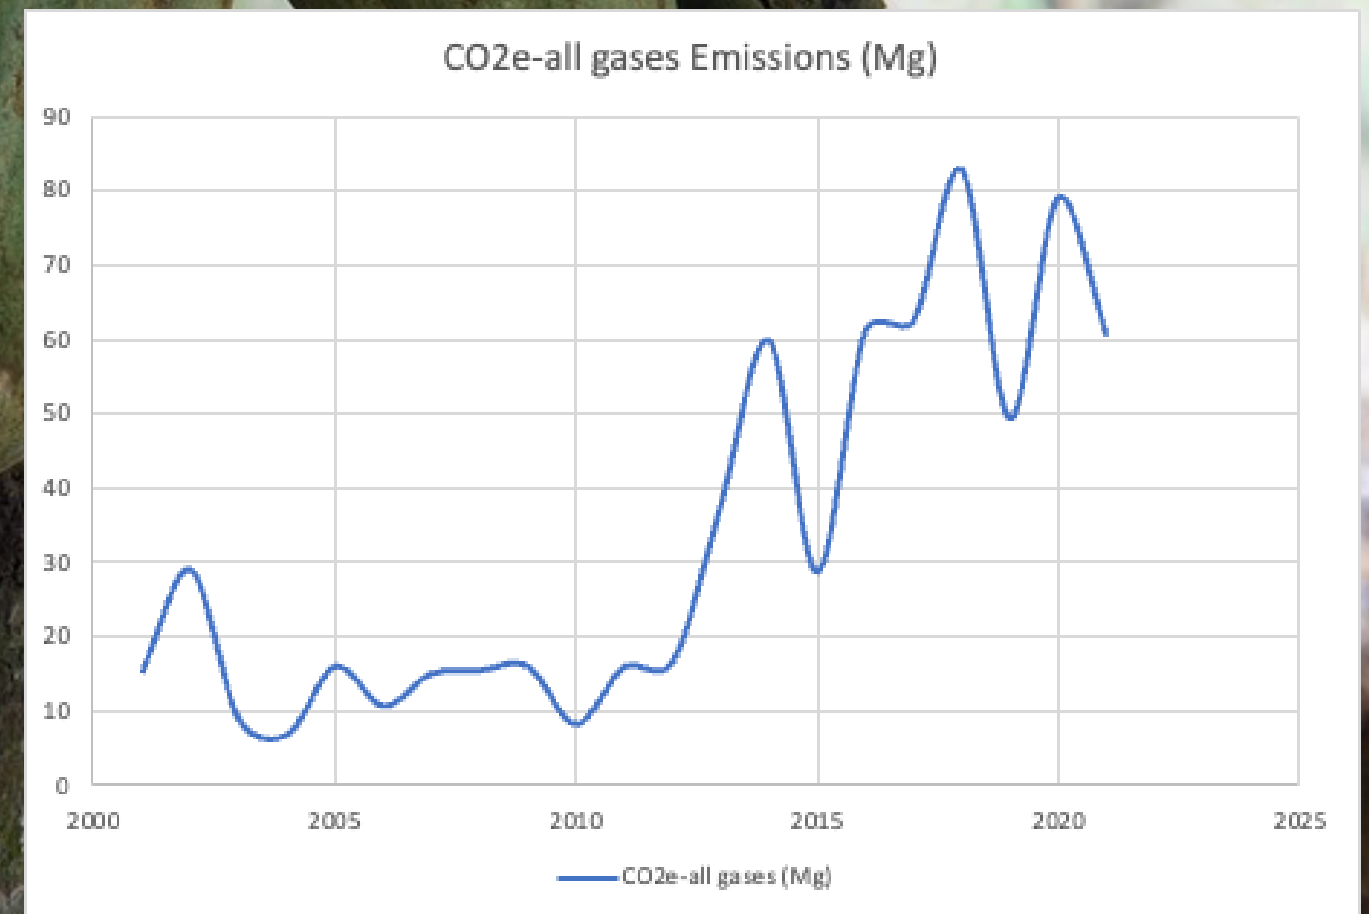

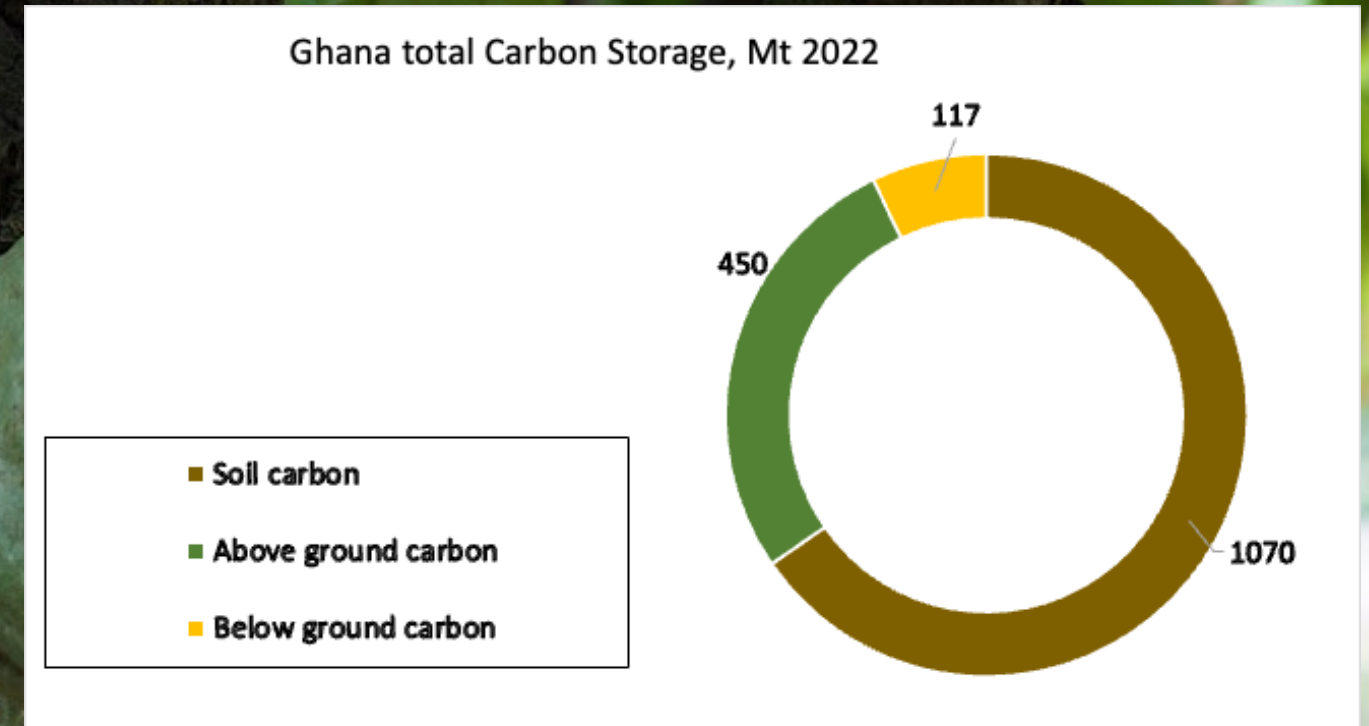

Why Ghana?

Problem

Increasing deforestation and forest degradation in Ghana increase vulnerability in agro-forestry production, higher risk due to climate change, higher footprint of agricultural production, lower sustainability rating.

Solution

Provide financial incentives to maintain Natural Capital

Translate Natural Capital into financial values to all agents: from farm to fork

*We provide a science-based carbon accounting platform
and a Carbon-Offsetting platform, enabling companies to
reduce their carbon footprints.*

Monitor & monetize ecosystem services

That enable processing companies cost effective reporting of their activities on ESG values.

Carbon offset Platform

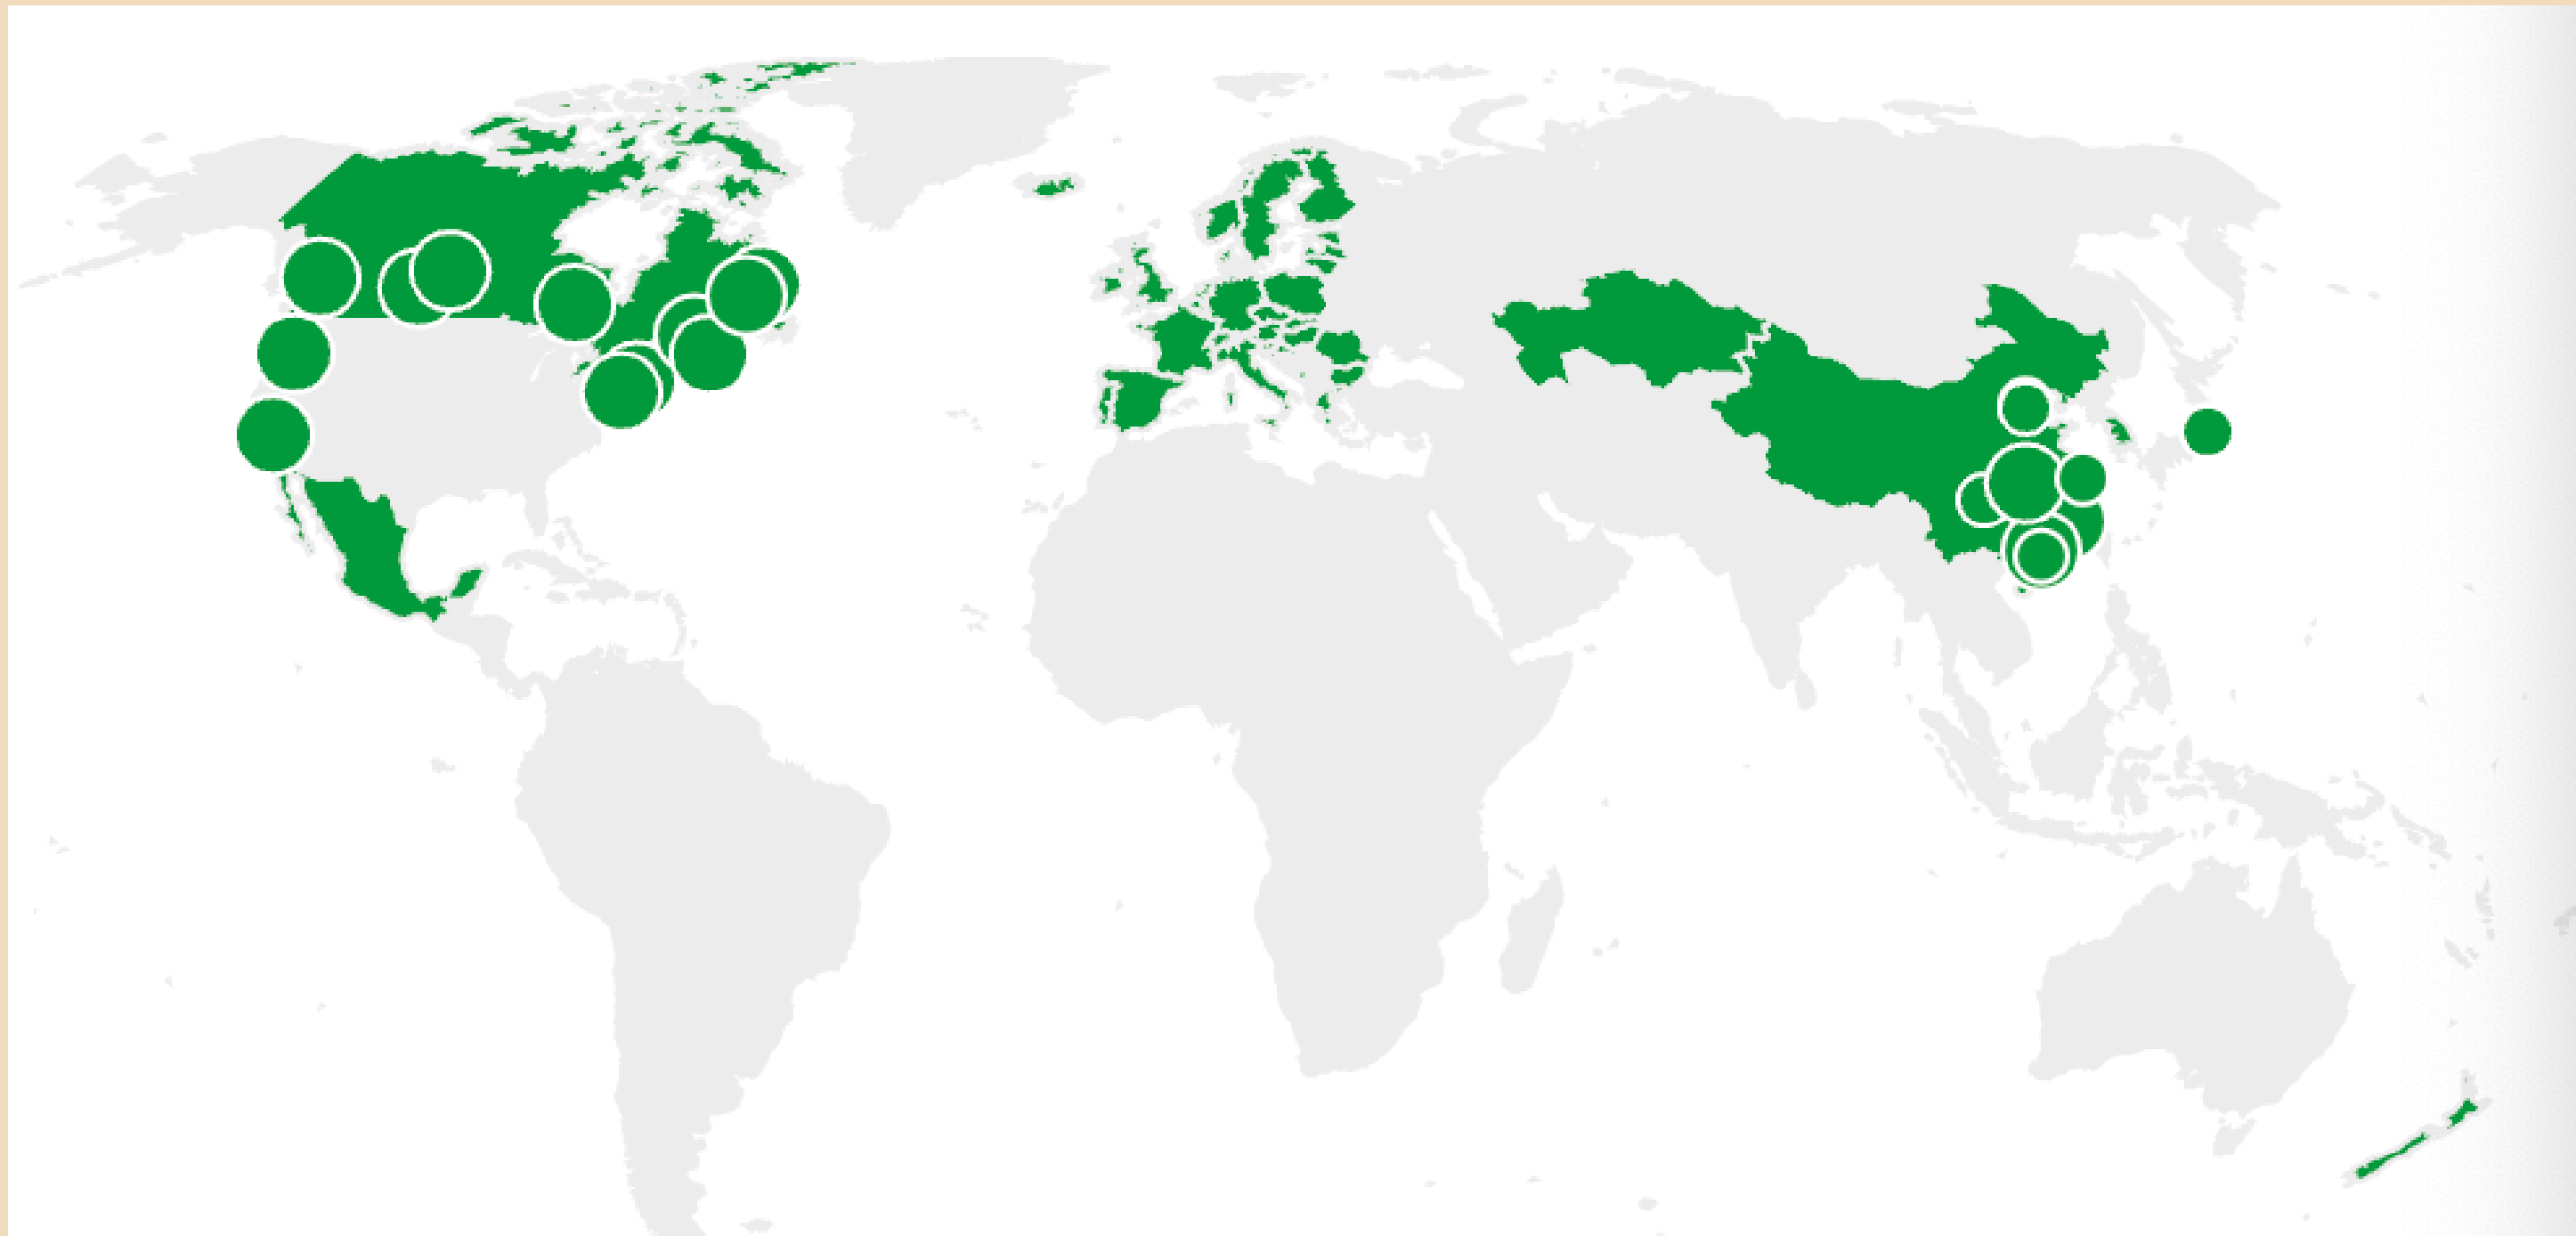

Our cutting-age remote sensing monitoring and ecological report enables you to operate in the carbon market and offset emission.

Sustainability Report

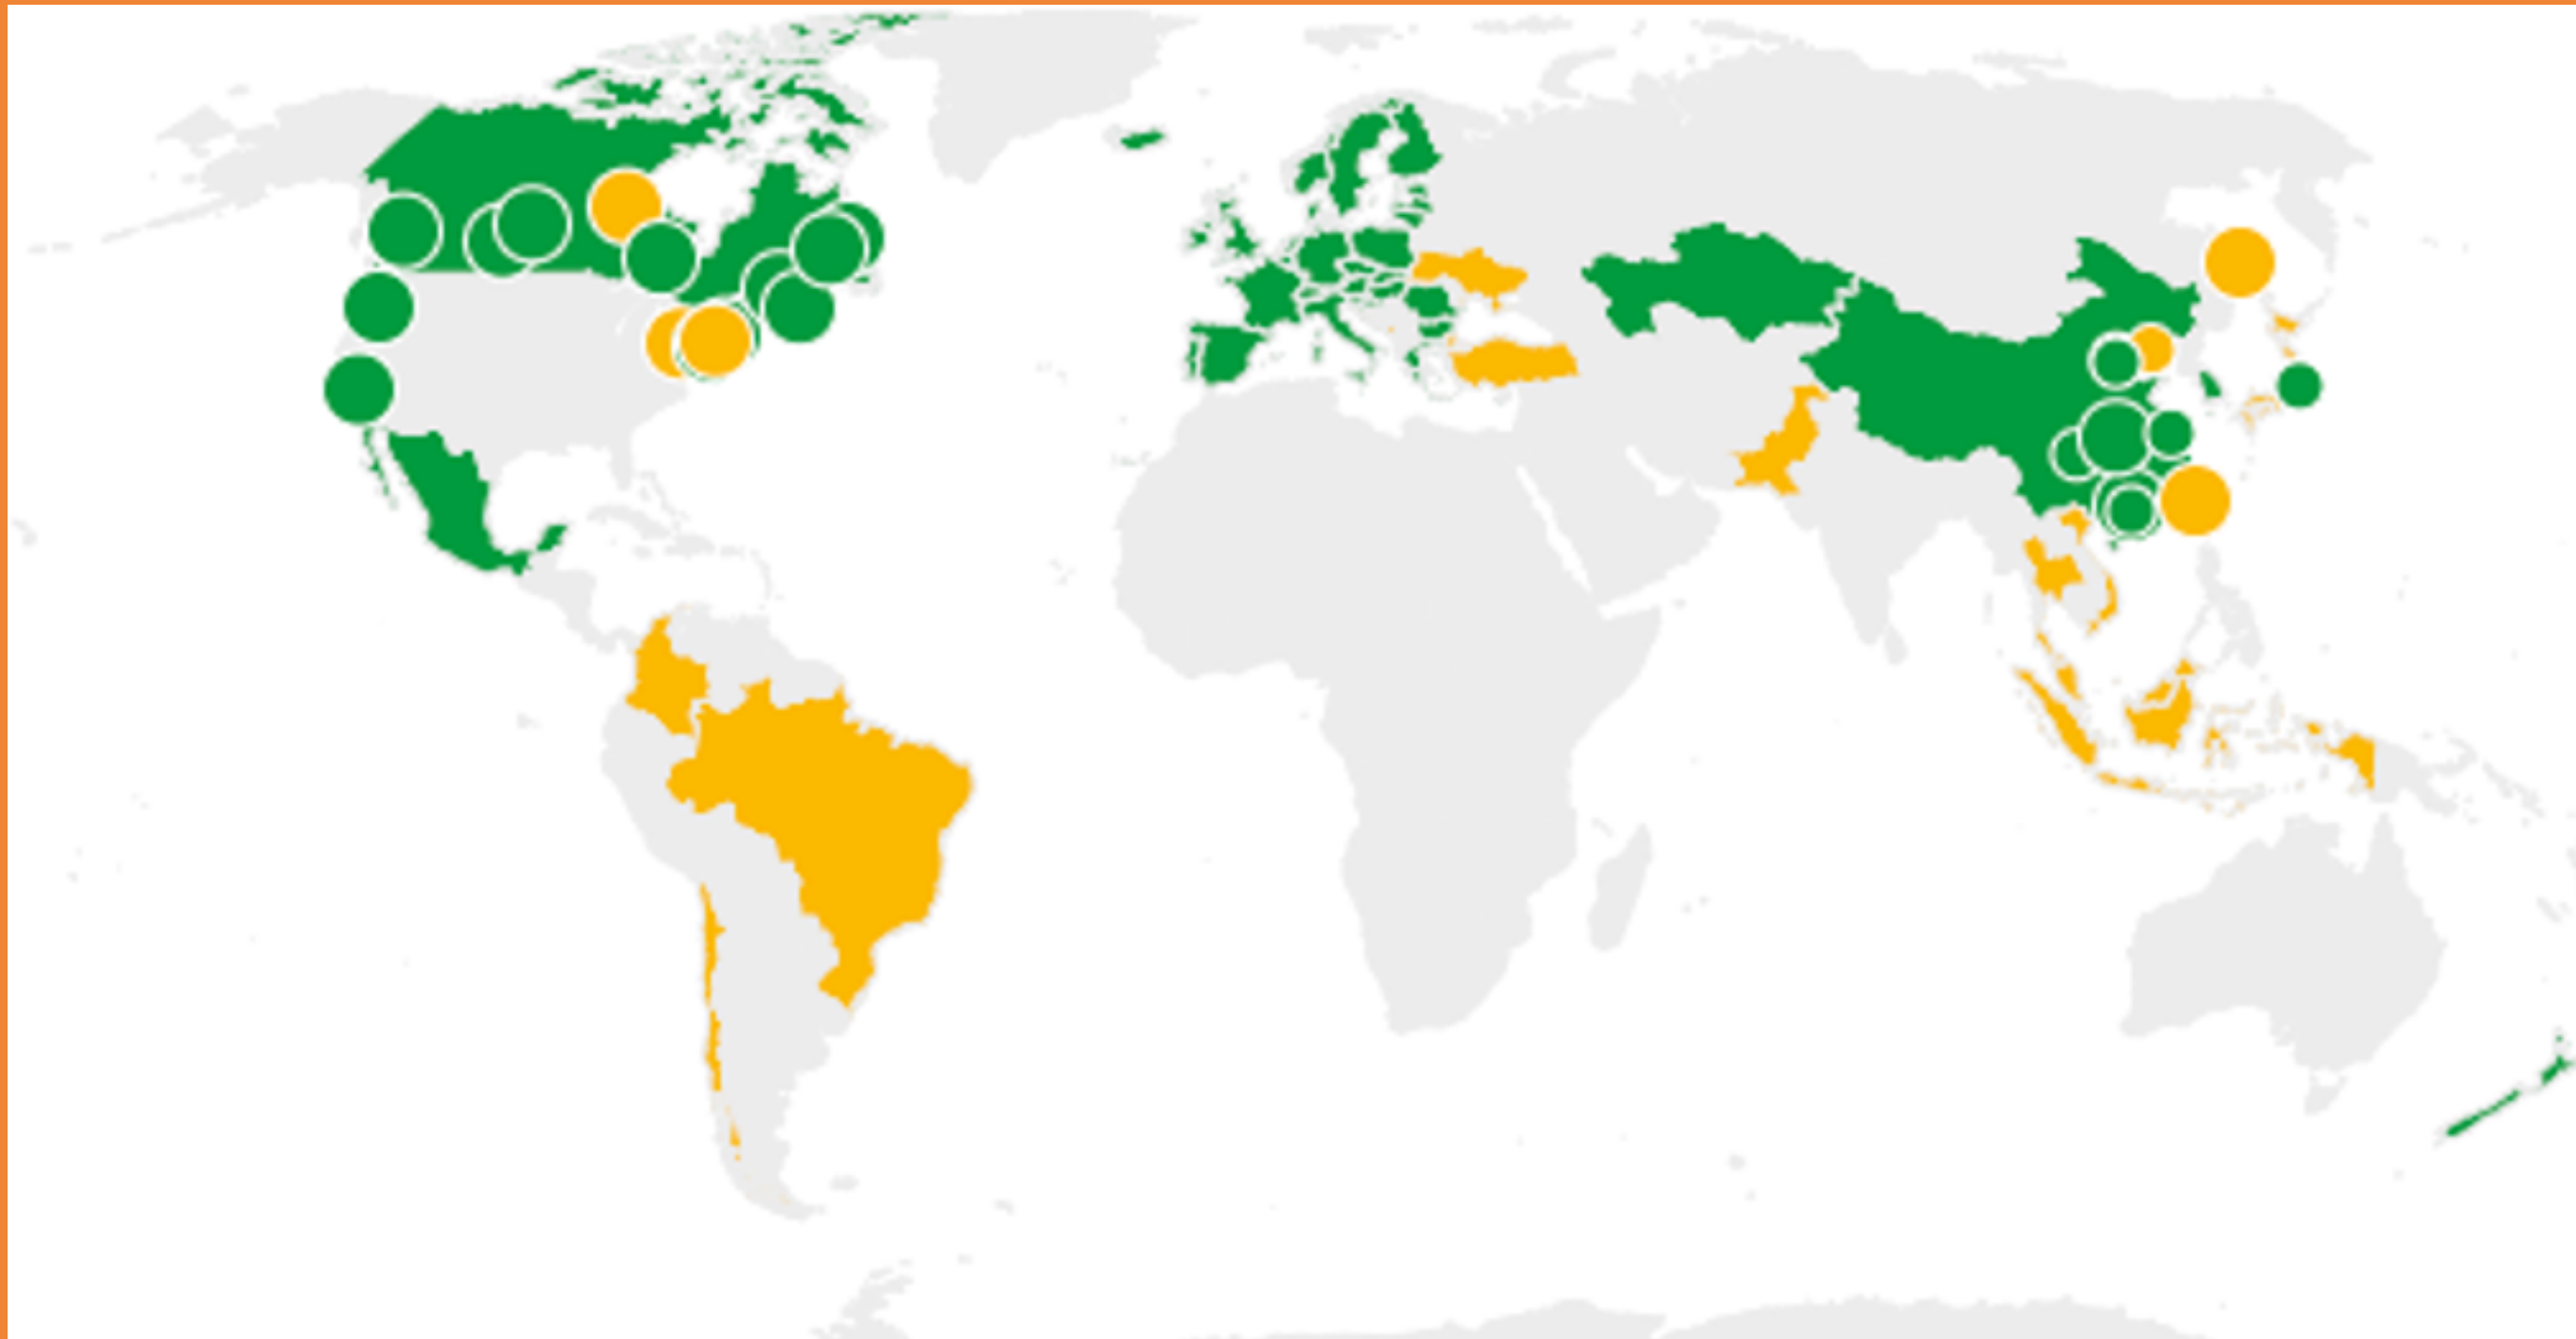

We turn your action into additional income. Using AMMAI CarbonForestry you contribute to the achievement of Sustainable goals and increase corporate Reputation.

That is why we invest in it!
